DAN MATHIESON

Technical Commercial Leader | Production AI Systems Builder | Enterprise Revenue Driver

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

I build production AI systems, then use them to drive enterprise commercial outcomes at scale. At Smarter Technologies, I shipped a 5-agent meeting intelligence platform and 22 agentic skills from scratch, then ran $31.8M in active healthcare enterprise pipeline through it with a 2-person team. At Thoughtful AI, I delivered 63% of net new ARR during a 3x growth year by owning the full cycle: discovery workshops, pseudo-code specs, hybrid-RAG systems, eval-engineered testing, and production sign-off. Career-long track record across the full stack: from Markov Chain Monte Carlo simulations at FanDuel, to Airflow-orchestrated data pipelines at Action Network, to multi-agent LLM tooling today. Comfortable writing Python that ships to production, presenting architecture to a CISO, or closing a deal at the board level.

EXPERIENCE

Director, Sales & Solutions Engineering — 2025 – Present

Smarter Technologies | San Francisco, CA

PE-backed rollup of Thoughtful AI, SmarterDx, Access Healthcare, and Pieces. Promoted from Lead TPM when the sales team requested dedicated SE leadership. Built the entire SE function from scratch while personally carrying 62% of total company pipeline across 10+ clinical specialties.

AI-Powered SE Platform

- Architected a **5-agent parallel meeting intelligence pipeline** processing every sales call in real time, extracting technical requirements, competitive signals, objections, and pricing context, routing each automatically to product, delivery, and sales leadership
- Built **76 prospect workspaces** using Git worktrees as isolated deal environments with automated bidirectional sync between Notion and Salesforce, including stage velocity tracking and forecasting dashboards used in VP and CEO reviews; shipped **943 commits and 451 PRs** while simultaneously running live pipeline
- Designed a **custom demo creation pipeline** generating complete, prospect-specific demo packages from structured context inputs, cutting delivery time from 3-4 days to 3-4 hours; packaged 22 AI skills via Claude's co-work platform so non-technical team members could invoke agentic capabilities without writing prompts from scratch
- Built a **hooks-based usage tracking and feedback sampling system** logging every skill invocation, with a 15-20% prompt rate for thumbs-up/down ratings, feeding signal directly back into skill specification iteration

Healthcare Enterprise Pre-Sales

- Managed **61 simultaneous enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, ABA therapy, specialty medicine, and dental; evaluated integration readiness across Epic, Cerner, Athena, NextGen, eClinicalWorks, and 7 other EMR platforms
- Closed two enterprise deals: a **$1.9M TPA administrator win** (4 AI agents across 4 geographic regions) and a **$1M/yr EHR vendor strategic partnership** (37 meetings over 4 months, ecosystem integration covering 80+ enterprise customers, CO16 denial guide included)
- Anchored **large metropolitan health system design partnership** (65,000-employee system, $30-40M potential): Epic integration depth, enterprise data architecture review, cost-takeout framework, and multi-year roadmap across 2 days of on-site discovery
- Ran on-site **discovery workshops at two large metropolitan health systems**: 2-day process mapping sessions with cross-functional teams producing scoped automation specs with explicit agreement on what would not be built
- Architected a **5-agent meeting evaluation pipeline** that scored pitch quality, objection handling, technical depth, and stakeholder management across 85 recorded prospect meetings, built specifically to identify where deals were being lost, not just how they felt

Commercial Innovation and Compliance

- Designed **5 pricing architectures** (transaction-based, FTE cost-reduction, fixed+variable hybrid, volume step-down, contingency) and built commercial models used by the CEO in

KEY METRICS

$31.8M
Active pipeline personally managed (Smarter)

63%
Net new ARR at Thoughtful AI during 3x YoY growth year

96%
Pre-sales funnel pass-through rate at Thoughtful AI

225%+
YoY revenue per mobile user at Action Network

95%
Hybrid-RAG accuracy on eligibility in production (2 days)

TECHNICAL SKILLS

Agentic AI
Claude Agent SDK, MCP, Multi-Agent Pipelines, RAG, pgvector, LLM Tool Use, Eval Engineering, Prompt Engineering

Languages & Data
Python, SQL (Redshift, PostgreSQL, GoogleSQL), TypeScript, pandas, Jupyter, Airflow

BI & Visualization
QuickSight, Tableau, Chartio, Google Data Studio, Google Sheets / Apps Script

GTM & CRM
Salesforce (pipelines, reports, dashboards), Notion, Make/Integromat, Webhooks, Zapier

Infrastructure
Git, GitHub Actions, AWS, Docker, Next.js, React

Healthcare
HIPAA, BAA, SOC 2 advisory, FHIR, EDI/HL7, 12+ EMR platforms, RCM workflows

board-level conversations; built an **automation estimation engine** using payer EDI data, EHR scope, and volume modeling to produce defensible ROI projections across 30+ active proposals

- Built a **security questionnaire automation system** using Claude Code against a versioned repository of prior RFP and security responses, cutting questionnaire turnaround from days to hours; served as primary point of contact for health system IT security teams on HIPAA, BAA, SOC 2, data residency, and third-party risk reviews

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Program Manager — 2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA

Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Promoted to Lead TPM within 3 months because I was already doing product work before the title reflected it. Promoted to Director SE at the combined entity at close of merger.

- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x year-over-year: owned the full cycle from scoping through production sign-off for 60% of completed deliveries, achieving a 96% funnel pass-through rate as the primary pre-sales technical advisor
- Built Thoughtful's **first production GenAI system**: a hybrid-RAG eligibility verification solution matching unstructured free-text coverage limitations to correct billing determinations using OpenAI embeddings and in-context learning. Achieved over 95% accuracy within two days; the approach was presented to the board and replicated across 3 additional automations within a month
- Developed a **PRD delivery methodology**: 8-20 hour SOP capture sessions with customers, pseudo-code decision-tree specs that engineers built directly from, customer-signed definition of done before any code was written, and a personal test plan execution before every production sign-off
- Built the company's **first customer-facing analytics product** on AWS QuickSight: wrote custom PostgreSQL queries including JSON parsing of nested agent execution logs to transform hundreds of thousands of automation records into dashboards used in executive QBRs
- Built **eval engineering infrastructure** for every AI system: labeled holdout datasets, precision/recall tracking by failure category, and regression test suites that ran before every model or prompt change
- Developed a **value realization simulation** in Python covering the full RCM lifecycle: probability distributions across billing workflow stages, QuickSight dashboards per agent translating model performance into staff hours saved and denial-protected revenue; became the core value proposition framework used by sales with healthcare CFOs and COOs
- Stabilized **3x standard implementation load** of struggling accounts during a critical growth phase, preventing a wave of customer departures through transparent recovery plans and rebuilt stakeholder trust

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics — 02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift, scraping 80+ partner dashboards and reducing reporting cycles from weeks to hours
- Architected a post-acquisition pivot from audience to revenue metrics: built the **"Value Clicks" model** correlating content consumption to downstream affiliate conversion, informing a multi-million-dollar strategic pivot and driving **70%+ YoY revenue growth**
- Created **"Value Clicks"** as the company-wide north star metric, adopted by both content and product teams as the shared KPI across all roadmap decisions; drove a **225%+ YoY improvement in revenue per mobile app user**
- Built **affiliate LTV financial models** evaluating revenue-share deals worth $500K-$2M/year, presenting directly to CFO and executive leadership with cohort retention, loss rate, and state-level tax modeling

Revenue Analyst, G-Suite Finance — 01/2020 – 02/2021

Google | Sunnyvale, CA

- Built a **full P&L transformation and reporting suite** in GoogleSQL, automatically piping data into custom executive dashboards and Google Sheets consumed by finance leaders across Google Cloud
- Built and maintained revenue dashboards and P&L statements covering **500M+ SaaS users**; improved top-line revenue forecast accuracy by **7%** using Google AI/ML tooling
- Automated forecast cube generation using **Google Apps Script and SAP integration**, eliminating manual reporting cycles and becoming a go-to internal resource for tool and process questions

Manager, Revenue & Forecasting — 08/2016 – 12/2019

FanDuel | New York, NY

- Built the **entire revenue reporting infrastructure** on Redshift SQL: daily queries for retention analysis, LTV segmentation, and bonus targeting by user propensity; built Chartio dashboards consumed by the full C-suite
- Built a **Markov Chain Monte Carlo simulation** modeling user state transitions across 17 segments (spend level, sport preference, retention band) to forecast season revenue to within **2% error**
- Built a **Python Slackbot** triggered by slash commands, reducing manual reporting by 40% and putting key metrics directly in the flow of daily operations; designed and taught SQL courses to the operations team
- Progressed from business analyst to revenue team lead over 3.5 years, building the data infrastructure the company ran on

EDUCATION

B.S. Electrical & Computer Engineering , Bucknell University — 08/2012 – 05/2016

AI & Machine Learning Professional Certificate , CalTech / SimpliLearn 10/2022 – 04/2023
