DAN MATHIESON

Enterprise Solutions Engineer | Technical Pre-Sales Leader | Production API Integration Builder

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

Enterprise SE who builds the integrations and demos he uses to close deals. At Smarter Technologies, I personally managed **61 simultaneous enterprise deals** across $31.8M in pipeline with a 96% prospect-to-proposal conversion rate, while shipping 943 commits of production tooling that made the motion possible: bidirectional Notion-Salesforce sync, custom demo pipelines, meeting intelligence agents, and security questionnaire automation. At Thoughtful AI, I delivered 63% of net new ARR during a 3x growth year by owning the full pre-sales cycle from on-site discovery workshops through production sign-off. I build against APIs I demo: the Notion Meeting Intelligence system I shipped at Smarter Technologies is a multi-agent pipeline that runs live sales meeting recordings through Claude and writes structured deal intelligence directly into Notion workspaces.

EXPERIENCE

Director, Sales & Solutions Engineering — 2025 – Present

Smarter Technologies | San Francisco, CA

PE-backed rollup of Thoughtful AI, SmarterDx, and Access Healthcare. Built the entire SE function from scratch while personally managing 62% of total company pipeline. Retained as 1 of ~15% of employees after April 2026 shutdown; only non-Product/Engineering person kept.

Enterprise Pre-Sales

- Managed **61 simultaneous enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, and dental, achieving a **96% prospect-to-proposal conversion rate** within 30 days of first meeting
- Closed two enterprise deals: a **$1.9M TPA administrator win** (4 AI agents across 4 geographic regions) and a **$1M/yr EHR vendor strategic partnership** (37 meetings over 4 months, ecosystem integration covering 80+ enterprise customers)
- Anchored a **$30-40M health system design partnership** (65,000-employee system): led 2-day on-site discovery sessions covering Epic integration depth, enterprise data architecture review, cost-takeout framework, and multi-year roadmap with cross-functional stakeholder sign-off
- Primary contact for health system IT security teams on **HIPAA, BAA, SOC 2, data residency, and third-party risk reviews**; built security questionnaire automation cutting turnaround from days to hours
- Evaluated integration readiness across **Epic, Cerner, Athena, NextGen, eClinicalWorks, and 7 other EHR platforms** across 8 clinical specialties

API Integration and Tooling Platform

- Built the **Notion Meeting Intelligence system**: a multi-agent pipeline ingesting sales call recordings, extracting structured deal intelligence (requirements, objections, competitive signals, pricing context), and writing it directly into Notion deal workspaces via the Notion API with bidirectional Salesforce sync
- Built **76 prospect workspaces** using Git worktrees as isolated deal environments with automated sync across Notion, Salesforce, Google Drive, Fireflies, and GitHub Actions; shipped **943 commits and 451 PRs** while simultaneously running live pipeline
- Designed a **custom demo creation pipeline** generating complete prospect-specific demo packages from structured context inputs, cutting delivery from 3-4 days to 3-4 hours
- Packaged **22 AI skills via Claude's co-work platform** so non-technical team members could invoke agentic capabilities without writing prompts from scratch; built hooks-based usage tracking and feedback sampling to iterate on skill quality

SMARTER TECHNOLOGIES

$31.8M
Active pipeline personally managed (61 enterprise deals)

96%
Prospect-to-proposal conversion rate, 30 days

$1.95M
Closed-won revenue, 7-month tenure

THOUGHTFUL AI

63%
Net new ARR during 3x YoY growth year

95%
Hybrid-RAG eligibility accuracy in production (2 days)

TECHNICAL SKILLS

GTM and API Integration
Notion API, Salesforce (pipelines, reports, bidirectional sync), Google Drive/Sheets API, Fireflies, GitHub Actions, Make/Integromat, Webhooks

Agentic AI
Claude Agent SDK, MCP, Multi-Agent Pipelines, RAG, pgvector, LLM Tool Use, Eval Engineering, Prompt Engineering

Languages and Data
Python, SQL (Redshift, PostgreSQL, GoogleSQL), TypeScript, pandas, Jupyter, Airflow

Infrastructure
Git, GitHub Actions, AWS, Docker, Next.js, React

Enterprise Compliance
HIPAA, BAA, SOC 2 advisory, FHIR, EDI/HL7, 12+ EHR platforms

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Program Manager — 2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA

Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Promoted to Lead TPM within 3 months. Promoted to Director SE at the combined entity at close of merger.

- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x year-over-year: owned the full pre-sales cycle from scoping through production sign-off, achieving a 96% funnel pass-through rate as the primary technical advisor
- Ran **on-site discovery workshops at two large metropolitan health systems**: Jefferson Health (65,000-employee system) and Presbyterian Health (New Mexico), producing scoped automation specs with customer-signed definition of done before any code was written
- Built Thoughtful's **first production GenAI system**: a hybrid-RAG eligibility verification solution achieving over **95% accuracy within two days**, presented to the board and replicated across 3 automations within a month
- Developed a **PRD delivery methodology**: 8-20 hour SOP capture sessions with customers, pseudo-code decision-tree specs engineers built from directly, and a personal test plan execution before every production sign-off
- Built the company's **first customer-facing analytics product** on AWS QuickSight: custom PostgreSQL queries parsing nested agent execution logs into executive dashboards used in QBRs
- Stabilized **3x standard implementation load** of struggling accounts during a critical growth phase, rebuilding stakeholder trust through transparent recovery plans with explicit success metrics

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics — 02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift, scraping 80+ partner dashboards and reducing reporting cycles from weeks to hours
- Architected a post-acquisition pivot from audience to revenue metrics: built the **"Value Clicks" model** correlating content consumption to downstream affiliate conversion, driving **70%+ YoY revenue growth** and a **225%+ improvement in revenue per mobile user**
- Built **affiliate LTV financial models** evaluating revenue-share deals worth $500K-$2M/year, presenting directly to CFO and executive leadership

Revenue Analyst, G-Suite Finance — 01/2020 – 02/2021

Google | Sunnyvale, CA

- Built revenue dashboards and P&L statements covering **500M+ SaaS users**; improved top-line forecast accuracy by **7%** using Google AI/ML tooling
- Automated forecast cube generation using **Google Apps Script and SAP integration**, eliminating manual reporting cycles

Manager, Revenue & Forecasting — 08/2016 – 12/2019

FanDuel | New York, NY

- Built the entire revenue reporting infrastructure on Redshift SQL: daily retention analysis, LTV segmentation, and bonus targeting by user propensity across C-suite Chartio dashboards
- Built a **Markov Chain Monte Carlo simulation** modeling user state transitions across 17 segments to forecast season revenue to within **2% error**

EDUCATION

B.S. Electrical & Computer Engineering , Bucknell University — 08/2012 – 05/2016

AI & Machine Learning Professional Certificate , CalTech / SimpliLearn — 10/2022 – 04/2023
