DAN MATHIESON

Claude Code Platform Builder | Enterprise AI Enablement | Technical Solutions Engineering

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

I have spent the past two years building production systems on Claude Code and deploying them to enterprise teams, which means I have already solved the exact adoption problems this role exists to address. At Smarter Technologies, I built a 22-skill, 5-agent platform on Claude Code from scratch, packaged the highest-impact capabilities via Cowork for non-technical users with pre/post tool-use hooks and a real feedback loop, and used it to manage $31.8M in enterprise pipeline. I built an event-driven agent that automatically injected field intelligence from discovery calls into the engineering team's weekly standups. At Thoughtful AI, I built the company's first production GenAI system, achieved a 96% pre-sales funnel pass-through rate by making complex AI accessible to non-technical enterprise buyers, and built the customer analytics product that became the core GTM sales artifact. I understand what enterprise AI adoption requires from both sides: as the person who built the platform and as the person who made it real for the people who needed to use it.

EXPERIENCE

VP, Solutions (AccessHealthcare) / Director, Sales Engineering (Smarter Technologies)

2025 – Present

Smarter Technologies / AccessHealthcare | San Francisco, CA

Promoted from Lead TPM when sales team requested dedicated SE leadership at the PE-backed Thoughtful AI rollup. Built the full SE function from scratch. After company wind-down in April 2026, retained as one of 15% kept, the only non-Product/Engineering person, and promoted to VP of Solutions at AccessHealthcare (largest portfolio company, multi-billion dollar healthcare RCM BPO) within the first month.

Claude Code Platform Engineering

- Architected a **22-skill, 5-agent production platform on Claude Code** as the primary operating system for managing $31.8M in enterprise pipeline; shipped **943 commits and 500+ PRs** in 7 months while simultaneously running 61 live deals
- Implemented **pre- and post-tool-use hooks** to log every skill invocation and sample user feedback on 15-20% of usages (thumbs up/down with optional notes); achieved a **93% tool approval rating** across sampled interactions in the first three weeks of cross-company deployment; signal fed directly into skill specification iteration
- Built an **event-driven product feedback pipeline**: a sub-agent applied current Notion roadmap data to every discovery call analysis; a second agent waited for weekly engineering standup pages to be created and auto-populated a market feedback section with field observations from that week's calls, closing the loop between customer conversations and engineering priorities without any manual steps
- Built a **custom demo creation skill** generating complete, prospect-specific demo packages (data files, manifests, test suites, makefiles) from structured context, cutting creation from 3-4 days to 3-4 hours; every demo validated against automated tests before the prospect meeting

Enterprise Enablement & Team Adoption

- Led design and deployment of a **unified Cowork skill platform** covering all operational teams (sales, GTM, delivery) across Thoughtful and Smarter Technologies, consolidating independently-built Claude Code work into one governed package using Anthropic's GitHub-based plugin repository system to distribute role-specific skill sets; led org-level governance for plugin access controls, discoverability, and rollout sequencing across Claude for Enterprise
- Built a **security questionnaire automation skill** using Claude Code against a versioned RFP repository, cutting turnaround from days to hours with Git-versioned audit trail; delivered live technical architecture walkthroughs to CISOs and IT security leadership at enterprise health systems
- Retained post-shutdown as **VP of Solutions at AccessHealthcare**; leads external enterprise AI adoption strategy and internal AI enablement initiatives helping existing BPO client operations leverage AI agents to improve operational efficiency and quality; works across India-based delivery teams daily

SMARTER TECH (LAST 7 MO)

93%
Cowork skill approval rating across sales, GTM & delivery (15% sampled interactions)

96%
Pre-sales proposal pass-through rate at Thoughtful AI

$31.8M
Active pipeline personally managed (2-person team)

THOUGHTFUL AI (2023-2025)

63%
Net new ARR during Thoughtful's 3x YoY growth year

95%
Hybrid-RAG accuracy on live eligibility workflow (2 days)

TECHNICAL SKILLS

Claude Code & Agentic AI
Claude Code, Claude Cowork, Subagents, Hooks (pre/post), MCP, Tool Use, Multi-Agent Pipelines, Prompt Engineering

LLM Development
RAG, pgvector, Eval Engineering, OpenAI Embeddings, In-Context Learning, Regression Testing

Enablement & GTM
Workshop Design, Training Delivery, Skill Packaging, Enterprise Discovery, Solutions Architecture

Languages & Integration
Python, SQL, TypeScript, Notion API, Fireflies, Google APIs, GitHub Actions, Git worktrees

Healthcare
FHIR, EDI/HL7, 12+ EMR platforms, HIPAA/BAA/SOC 2, RCM workflows

Healthcare Enterprise Pre-Sales

- Managed **61 simultaneous enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, dental, and specialty medicine; evaluated integration readiness across Epic, Cerner, Athena, NextGen, eClinicalWorks, and 7 other EMR platforms
- Closed **$1.95M in revenue**: $1.9M TPA administrator win (4 AI agents, 4 regions) and $1M/yr EHR vendor strategic partnership (80+ enterprise customers, CO16 denial guide, 37 meetings); anchored $30-40M design partnership at a 65,000-employee health system with 2-day on-site discovery sessions

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Program Manager — 2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA

Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Promoted to Lead TPM within 3 months because I was already doing product work before the title reflected it. Became the go-to pre-sales technical voice; 96% of prospects who met with me moved to proposal within a month. Promoted to Director SE at the merged entity when the sales team requested me full-time.

- Built Thoughtful's **first customer-facing analytics product** on AWS QuickSight, parsing nested JSON execution logs from hundreds of thousands of agent runs via PostgreSQL into dashboards used in executive QBRs; product became the core GTM sales artifact demonstrating agent observability differentiation to prospects; CEO/CPO started bringing me into large deals to explain the platform, achieving a **96% prospect-to-proposal conversion rate**
- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x YoY; owned full cycle from discovery through production sign-off; developed the MAP delivery methodology (8-20 hour SOP capture sessions, pseudo-code decision-tree specs engineers build directly from, customer-signed definition of done before any code is written)
- Built the company's **first production GenAI system**: a hybrid-RAG eligibility verification solution matching unstructured free-text coverage limitations to correct billing determinations using OpenAI embeddings and in-context learning; achieved **95%+ accuracy within two days** on live billing workflows; presented to the board, replicated across 3 additional automations within a month
- Built **eval engineering infrastructure** for every AI system: labeled holdout datasets, precision/recall tracking by failure category, regression test suites that ran before every model or prompt change; operated as the primary QA layer before anything reached a customer environment
- Developed **value realization simulation** in Python covering the full RCM lifecycle: probability distributions across billing workflow stages, QuickSight dashboards per agent translating performance to staff hours saved and denial-protected revenue; became core value proposition framework used with healthcare CFOs and COOs

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics — 02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift; architected the "Value Clicks" north star metric correlating content to affiliate conversion, driving **70%+ YoY revenue growth** and a **225%+ YoY improvement in revenue per mobile user**
- Built **affiliate LTV financial models** evaluating revenue-share deals worth $500K-$2M/year, presenting to CFO and executive leadership with cohort retention, loss rate, and state-level tax modeling

Revenue Analyst, G-Suite Finance — 01/2020 – 02/2021

Google | Sunnyvale, CA

- Built P&L reporting suite in GoogleSQL for 500M+ SaaS users; improved top-line forecast accuracy by **7%** using Google AI/ML tooling; automated forecast cube generation via **Google Apps Script and SAP integration**; designed and taught Apps Script training course to the finance team

Manager, Revenue & Forecasting — 08/2016 – 12/2019

FanDuel | New York, NY

- Built the entire revenue reporting infrastructure on Redshift; built a **Markov Chain Monte Carlo simulation** forecasting season revenue to within **2% error** across 17 user segments; built a Python Slackbot reducing manual reporting 40%; **designed and taught SQL courses** to the operations team

EDUCATION

B.S. Electrical & Computer Engineering , Bucknell University — 08/2012 – 05/2016

AI & Machine Learning Professional Certificate , CalTech / SimpliLearn — 10/2022 – 04/2023

INDEPENDENT RESEARCH

Healthcare Agent Data Layer — 2025 – Present

- Designed an **MCP-native clinical data platform** architected as the missing infrastructure layer between healthcare AI agents and fragmented EHR/payer data sources: read path (FHIR R4 + proprietary portals as MCP tools), write path (RPA-backed write-through as MCP tools), consent-check middleware. Wrote technical architecture docs, investor memos, and a partner pitch positioning MCP as the default agent-tool interface for healthcare AI.
