DAN MATHIESON

GTM AI Builder | Revenue Systems Architect | Technical Commercial Leader

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

Technical commercial leader building a production-grade AI GTM platform from scratch on top of GitHub and Notion. Shipping 943 commits and managing $31.8M in active enterprise pipeline simultaneously in a solutions engineering leadership capacity. Career-long track record of architecting AI and automated workflows, automation systems, and data pipelines that make revenue teams measurably faster. Fluent across the full GTM stack: from SQL-driven LTV models and Airflow pipelines to multi-agent sales intelligence systems, Salesforce CRM reporting, and low-code automation with Make. Equally comfortable writing Python in a terminal, presenting architecture to a VP of Sales, or closing a deal with prospects at a board level.

EXPERIENCE

Director, Sales Engineering

2025 – Present

Smarter Technologies | San Francisco, CA

Promoted into GTM leadership role after becoming the connective tissue between engineering and the sales org. Built the entire SE operating system from scratch while personally carrying 62% of total company pipeline.

GTM AI Systems

- Architected a **5-agent parallel meeting intelligence pipeline** that processes every sales call in real time, extracting objections, competitive intel, product feedback, pricing signals, and follow-up items, routing each to product, delivery, and sales automatically
- Built **ephemeral prospect workspaces** on Git worktrees with automated bidirectional sync between Notion and Salesforce — 451 PRs generated, one per work session per deal
- Engineered a **custom demo creation pipeline** enabling a 2-person team to build and deliver prospect-specific demos in minutes; created an internal agent skills plugin scaling AI capabilities across the org
- Designed an **ICP scoring model** and automation estimation engine using payer EDI data, EHR scope analysis, and volume modeling, producing defensible ROI projections across 30+ prospects

CRM & Revenue Operations

- Maintained **Salesforce as canonical CRM** for pipeline, building custom reports and dashboard components used in VP and CEO-level reviews; tracked stage velocity, win probability, and forecasted bookings by quarter. Included bi-directional sync with Notion tracking infrastructure
- Managed **$31.8M in active pipeline** across 61 enterprise deals personally; closed $1.95M closed-won revenue across 5 deals with active opportunities from $50K to $4M
- Handled **4× the deal volume** of the second SE team member while maintaining quality scores above 80/100 which was enabled by building systems that scale

Cross-Functional Enablement

- Designed **5 pricing architectures** (transaction-based, FTE cost-reduction, fixed+variable hybrid, volume step-down, contingency) and built commercial models used by the CEO in board-level conversations
- Served as the bridge between engineering and sales leadership — translating technical constraints into commercial narratives and field feedback into product roadmap priorities

GTM IMPACT

$31.8M
Active pipeline personally managed via AI systems

943 Commits
Shipped while managing $31.8M in live pipeline

5 Agents
Parallel AI pipeline on every prospect meeting

451 PRs
Automated deal state syncs across Notion + Salesforce

TECHNICAL SKILLS

GTM & Automation
Salesforce (reports, dashboards, pipeline), Make/Integromat, Notion (databases, automations, APIs), Webhooks, Zapier

AI & Agent Workflows
Claude Agent SDK, Multi-Agent Pipelines, LLM Tool Use, Prompt Engineering, RAG Systems

Languages & Data
Python, SQL (Redshift, PostgreSQL, GoogleSQL), TypeScript, Airflow, pandas

Visualization & BI
Quicksight, Tableau, Chartio, Google Data Studio, Google Sheets / Apps Script

Infrastructure
Git, GitHub Actions, AWS, Docker, Next.js, React

EXPERIENCE (CONTINUED)

Solutions Architect → Customer Engineer → Lead Technical Program Manager
2023 – 2025

Thoughtful AI | San Francisco, CA

Progressed through 3 roles in 2 years at a Series A healthcare AI startup. Owned technical delivery, pre-sales, and the company's first customer-facing analytics product.

- Built Thoughtful's **first customer analytics product** on AWS Quicksight — wrote custom SQL queries including JSON parsers in PostgreSQL to transform hundreds of thousands of AI agent execution records into customer-facing dashboards embedded via iFrame in the product portal
- Functioned as **dedicated technical pre-sales advisor.** Designed and demoed bespoke AI solutions for each prospect, achieving a 96% funnel pass-through rate; drove 3× ARR YoY growth as primary technical resource for 60% of completed deliveries
- Built the company's **first hybrid-RAG workflow**, reducing human-in-the-loop exception rates by 90% and providing full model observability
- Stabilized **3× standard implementation load** of struggling accounts during a critical growth phase, preventing a wave of customer departures
- **Rescued and extended a customer's Make automation workflows** for an AI SOAP notes generator — fixed broken webhook configurations and JSON routing logic, then wired Thoughtful's AI agents to trigger those workflows bidirectionally via webhook, creating a tightly coupled low-code + full-code pipeline

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics
02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift, scraping 80+ partner dashboards and reducing reporting cycles from weeks to hours
- Architected post-acquisition pivot from audience to revenue metrics — built the **"Value Clicks" model** correlating content consumption to downstream affiliate conversion, driving 70%+ YoY revenue growth
- Built **affiliate LTV financial models** evaluating revenue-share deals worth $500K–$2M/year, presenting directly to CFO and executive leadership; modeled cohort retention, loss rates, and state-level tax adjustments
- Designed **user acquisition dashboards and KPI frameworks** in Tableau and Google Data Studio; drove 225%+ YoY improvement in revenue per mobile app user

Revenue Analyst, G-Suite Finance
01/2020 – 02/2021

Google | Sunnyvale, CA

- Built a **full P&L transformation and reporting suite** in GoogleSQL, automatically piping data into custom executive dashboards and Google Sheets consumed by finance leaders across Google Cloud
- Developed and maintained **670 dashboards and P&L statements** covering 0.5B SaaS users; improved top-line revenue forecast accuracy by 7% using Google AI/ML tooling
- Automated forecast cube generation using **Google Apps Script and SAP integration**, eliminating manual reporting cycles

Manager, Revenue & Forecasting
08/2016 – 12/2019

FanDuel | New York, NY

- Built the **entire revenue reporting infrastructure** on Redshift SQL — wrote custom queries daily for retention analysis, LTV segmentation, and bonus targeting by user propensity; built Chartio dashboards consumed by the full C-suite
- Automated reporting via a **Python Slackbot** triggered by Slack slash commands, reducing manual reporting by 40% and putting data directly in the flow of daily operations
- Built a **Markov-chain Monte Carlo simulation in SQL** forecasting LTV and revenue across 17 user cohorts to within 2% accuracy; designed and taught SQL courses to the operations team

EDUCATION

B.S. Electrical & Computer Engineering , Bucknell University — 08/2012 – 05/2016

AI & Machine Learning Professional Certificate , CalTech / SimpliLearn — 10/2022 – 04/2023
