

DAN MATHIESON

Claude Code Platform Builder | Enterprise AI Enablement | Technical Solutions Engineering
danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

I have spent the past two years building production Claude Code systems and deploying them to enterprise teams. At Smarter Technologies I built a **22-skill, 5-agent platform** managing \$31.8M in active pipeline, deployed the highest-impact capabilities via Cowork with pre/post tool-use hooks and a real feedback loop, and built event-driven agents that pushed **prospect-level insights to sales executives via Slack, email, and Notion**. At Thoughtful AI I built the company's **first production GenAI system** and achieved a 96% pre-sales funnel pass-through rate by making complex AI legible to non-technical enterprise buyers. I know what enterprise AI adoption requires from both sides.

EXPERIENCE

VP, Solutions Engineering (Smarter Technologies / AccessHealthcare)

2025 – Present

Smarter Technologies / AccessHealthcare | San Francisco, CA

Promoted from Lead TPM when the sales team requested dedicated Solutions Engineering leadership. Built the full SE function from scratch. After company wind-down in April 2026, retained as one of 15% of kept and promoted to VP of Solutions at AccessHealthcare (largest portfolio company, multi-billion dollar healthcare RCM BPO) within the first month (only legacy Thoughtful AI employee to be promoted).

Claude Code Platform Engineering

- Architected a **22-skill, 5-agent production platform on Claude Code** as the primary operating system for managing \$31.8M in enterprise pipeline; shipped **500+ PRs** while running 61 live deals
- Implemented **pre- and post-tool-use hooks** to log skill invocations and sample user feedback on 15-20% of usages; achieved a **93% tool approval rating** in the first three weeks of cross-company deployment; signal fed directly into skill specification iteration
- Built an **event-driven product feedback pipeline**: closing the loop between customer conversations and engineering priorities automatically with real-time, product-specific context from internal documentation, roadmaps, and JIRA boards
- Built a **custom demo creation skill** generating complete, prospect-specific demo packages from structured context, cutting creation from 3-4 days to 3-4 hours; every demo validated against automated tests before the prospect meeting

Enterprise Enablement & Team Adoption

- Led design and deployment of a **unified Cowork skill platform** covering all operational teams (sales, GTM, delivery) across Thoughtful and Smarter Technologies, consolidating independently-built Claude Code work into one governed package using Anthropic's GitHub-based plugin repository system to distribute role-specific skill sets across Claude for Enterprise
- Built a **security questionnaire automation skill** using Claude Code against a versioned RFP repository, cutting turnaround from days to hours with Git-versioned audit trail; delivered live technical architecture walkthroughs to CISOs and IT security leadership at enterprise health systems
- Retained post-shutdown as **VP of Solutions at AccessHealthcare**; leads enterprise AI adoption strategy and internal AI enablement across India-based BPO delivery teams daily

Healthcare Enterprise Pre-Sales

- Managed **61 enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, dental, and specialty medicine; evaluated integration readiness across Epic, Cerner, Athena, NextGen, ECW, and 7 other EMR platforms
- Closed **> \$3.0M in revenue**: \$1.9M TPA administrator win (4 AI agents, 4 regions) and \$1M/yr EHR vendor strategic partnership (80+ enterprise customers, CO16 denial guide, 37 meetings)
- Anchored \$30-40M design partnership at a 65,000-employee health system with 2-day on-site discovery sessions; Regularly performed AI-Enabled ROI sessions, building roadmaps for health systems to adopt AI optimizing for time to value and lowest burden to deliver

SMARTER TECH (LAST 9 MO)

93%

Cowork skill approval rating across sales, GTM & delivery (15% sampled interactions)

\$31.8M

Active pipeline managed with 2-person team and Claude Code

9.2

Avg Daily Active Users of internal Claude-based workflows

THOUGHTFUL AI (2023-2025)

63%

Net new ARR delivered during Thoughtful's 3x YoY growth year

96%

Pre-sales proposal pass-through rate as Lead TPM

95%

Hybrid-RAG accuracy on live eligibility workflow (2 days)

TECHNICAL SKILLS

Claude Code & Agentic AI

Claude Code, Claude Cowork, Subagents, Hooks (pre/post), MCP, Tool Use, Multi-Agent Pipelines, Prompt Engineering

LLM Development

RAG, pgvector, Eval Engineering, OpenAI Embeddings, In-Context Learning, Regression Testing

Enablement & GTM

Workshop Design, Training Delivery, ROI Optimization Frameworks, Skill Packaging, Enterprise Discovery, Solutions Architecture

Languages & Integration

Python, SQL, TypeScript, Notion API, Fireflies, Google APIs, GitHub Actions, Git worktrees

Healthcare

FHIR, EDI/HL7, 12+ EMR platforms, HIPAA/BAA/SOC 2, RCM workflows

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Program Manager

2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA

Seed -> Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Promoted to Lead TPM within 3 months because I was already doing product work before the title reflected it. Became the go-to pre-sales technical voice; 96% of prospects who met with me moved to proposal within a month. Promoted to Director SE at the merged entity when the sales team requested me full-time.

- Built Thoughtful's **first customer-facing analytics product** on AWS QuickSight, parsing nested JSON execution logs from hundreds of thousands of agent runs via PostgreSQL into dashboards used in executive QBRs; product became the core GTM sales artifact demonstrating agent observability differentiation to prospects; CEO/CPO started bringing me into large deals to explain the platform, achieving a **96% prospect-to-proposal conversion rate**
- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x YoY; owned full cycle from discovery through production sign-off; developed the MAP delivery methodology (8-20 hour SOP capture sessions, pseudo-code decision-tree specs engineers build directly from, customer-signed definition of done before any code is written)
- Built the company's **first production GenAI system**: a hybrid-RAG eligibility verification solution matching unstructured free-text coverage limitations to correct billing determinations using OpenAI embeddings and in-context learning; achieved **95%+ accuracy within two days** on live billing workflows; presented to the board, replicated across 3 additional automations within a month
- Built **eval engineering infrastructure** for every AI system: labeled holdout datasets, precision/recall tracking by failure category, regression test suites that ran before every model or prompt change; operated as the primary QA layer before anything reached a customer environment
- Developed **value realization simulation** in Python covering the full RCM lifecycle: probability distributions across billing workflow stages, QuickSight dashboards per agent translating performance to staff hours saved and denial-protected revenue; became core value proposition framework used with healthcare CFOs and COOs

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics

02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift; architected the "Value Clicks" north star metric correlating content to affiliate conversion, driving **70%+ YoY revenue growth** and a **225%+ YoY improvement in revenue per mobile user**
- Built **affiliate LTV financial models** evaluating revenue-share deals worth \$500K-\$2M/year, presenting to CFO and executive leadership with cohort retention, loss rate, and state-level tax modeling

Revenue Analyst, G-Suite Finance

01/2020 – 02/2021

Google | Sunnyvale, CA

- Built P&L reporting suite in GoogleSQL for 500M+ SaaS users; improved top-line forecast accuracy by **7%** using Google AI/ML tooling; automated forecast cube generation via **Google Apps Script and SAP integration**; designed and taught Apps Script training course to the finance team

Manager, Revenue & Forecasting

08/2016 – 12/2019

FanDuel | New York, NY

- Built the entire revenue reporting infrastructure on Redshift; built a **Markov Chain Monte Carlo simulation** forecasting season revenue to within **2% error** across 17 user segments; built a Python Slackbot reducing manual reporting 40%; **designed and taught SQL courses** to the operations team

EDUCATION

B.S. Electrical & Computer Engineering, Bucknell University

08/2012 – 05/2016

AI & Machine Learning Professional Certificate, CalTech / SimpliLearn

10/2022 – 04/2023

INDEPENDENT RESEARCH

Healthcare Agent Data Layer

2025 – Present

- Designed an **MCP-native clinical data platform** architected as the missing infrastructure layer between healthcare AI agents and fragmented EHR/payer data sources: read path (FHIR R4 + proprietary portals as MCP tools), write path (RPA-backed write-through as MCP tools), consent-check middleware. Wrote technical architecture docs, investor memos, and a partner pitch positioning MCP as the default agent-tool interface for healthcare AI.
