

DAN MATHIESON

Enterprise AI Solutions Architect | Forward-Deployed Technical Lead | C-Suite AI ROI Enablement

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

Forward-deployed enterprise AI advisor who runs C-suite discovery workshops, designs production LLM systems, and navigates enterprise procurement in healthcare. At Smarter Technologies, I built a **multi-agent platform on Claude Code managing \$31.8M in active pipeline** while leading AI adoption conversations with CFOs, CIOs, and operations leaders at multi-site health systems. Retained through an 85% headcount reduction as the only non-Product/Engineering person kept, specifically because of the ability to make genuinely complex AI systems and the ROI they provide legible to the people who need to adopt them.

EXPERIENCE

VP, Solutions (AccessHealthcare / Smarter Technologies)

2025 – Present

Smarter Technologies / AccessHealthcare | San Francisco, CA

PE-backed rollup of Thoughtful AI, SmarterDx, Access Healthcare, and Pieces. Built the full pre-sales Solutions and Systems Architecture function from scratch. After company wind-down in April 2026, retained as one of 15% kept and promoted to VP of Solutions at AccessHealthcare (largest portfolio company, multi-billion dollar healthcare RCM BPO).

Enterprise C-Suite Advisory & Discovery

- Led **structured discovery workshops with CFOs, CIOs, and operations leaders** at multi-site healthcare organizations, surfacing real adoption blockers (compliance frameworks, data governance gaps, workflow fit questions) and producing implementation roadmaps with explicit agreement on what would and would not be built based on ROI and delivery timeline estimates
- Ran **2-to-3-day on-site discovery sessions at two large metropolitan health systems**, including Epic integration depth review, enterprise data architecture assessment, cost-takeout framework across clinical and operational workflows, and multi-year AI adoption roadmap delivered to executive sponsors
- Designed and delivered **AI Center of Excellence enablement frameworks** for enterprise buyers: governance structures, approval chain documentation, and integration architecture specs that gave healthcare IT security leaders concrete answers to "what can this agent touch" at the SOC 2 and BAA review stage
- Built **AI adoption roadmaps for multi-site organizations** across 8+ healthcare verticals, translating automation ceiling analysis and payer capability data into multi-year deployment sequencing that CFOs could present to boards

Healthcare Enterprise Pre-Sales

- Managed **61 simultaneous enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, dental, and specialty medicine; evaluated integration readiness across Epic, Cerner, Athena, NextGen, eClinicalWorks, and 7 other EMR platforms
- Closed **> \$3M in revenue** across 5 deals: \$1.9M TPA administrator win (4 AI agents, 4 geographic regions) and \$1M/yr EHR vendor strategic partnership covering 80+ enterprise customers
- Personally owned **\$31.8M in active pipeline** as part of a 2-person team; built pricing architectures, ROI models, and bespoke custom demos used by the CEO in board-level enterprise conversations

Claude Code Platform Engineering

- Architected a **22-skill, 5-agent production platform on Claude Code** as the operating system for managing \$31.8M in enterprise pipeline; shipped **500+ PRs** in 7 months while simultaneously running 61 live deals
- Implemented **pre- and post-tool-use hooks** sampling user feedback on 15-20% of skill invocations; achieved a **93% tool approval rating** in the first three weeks of cross-company Cowork deployment across sales, GTM, and delivery teams
- Built an **event-driven product feedback pipeline**: agent applied Notion roadmap data to every discovery call; a second waited for weekly engineering standups and auto-populated a market feedback section from that week's field observations, closing the loop between customer conversations and engineering priorities automatically

SMARTER TECH (LAST 7 MO)

\$31.8M

Active pipeline personally managed (2-person team)

65K

Employee health system on-site discovery workshop (multi-site enterprise)

93%

Cowork skill approval rating across sales, GTM & delivery (15-20% sampled interactions)

THOUGHTFUL AI (2023-2025)

96%

Pre-sales proposal conversion rate (prospects to proposal within one month)

63%

Net new ARR delivered during Thoughtful's 3x YoY growth year

95%

Hybrid-RAG accuracy on live eligibility workflow (2 days)

TECHNICAL SKILLS

Enterprise AI Advisory

Discovery Workshop Design, C-Suite Stakeholder Navigation, AI Adoption Roadmaps, Centers of Excellence, Technical Due Diligence

Claude Code & Agentic AI

Claude Code, Cowork, Subagents, MCP, Pre/Post Hooks, Multi-Agent Pipelines, Prompt Engineering

Production LLM Systems

RAG, pgvector, Eval Engineering, Determinism-First Design, In-Context Learning, Regression Testing

Healthcare Domain

FHIR R4, EDI/HL7, 12+ EMR platforms, HIPAA/BAA/SOC 2, RCM workflows

Languages

Python, SQL, TypeScript, Notion API, GitHub Actions

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Program Manager 2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA
Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Promoted to Lead Technical Product Manager within 3 months. Became the go-to pre-sales technical voice; 96% of prospects who met with me moved to proposal within a month. Promoted to Director, Solutions Engineering at the merged entity when the sales team requested me full-time.

- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x year-over-year; owned the full cycle from discovery through production sign-off; developed MAP delivery methodology (8-20 hour SOP capture sessions, pseudo-code decision-tree specs engineers built directly from, customer-signed definition of done before any code was written)
- Built Thoughtful's **first customer-facing analytics product** on AWS QuickSight, parsing nested JSON execution logs from hundreds of thousands of agent runs into dashboards used in executive QBRs; product became the core GTM sales artifact demonstrating agent observability; CEO/CPO started bringing me into every large deal, achieving a **96% prospect-to-proposal conversion rate**
- Built the company's **first production GenAI system**: a hybrid-RAG eligibility verification solution matching unstructured free-text coverage limitations to correct billing determinations using OpenAI embeddings and in-context learning; achieved **95%+ accuracy within two days** on live workflows; presented to the board, replicated across 3 additional automations within a month
- Built **eval engineering infrastructure** for every AI system: labeled holdout datasets, precision/recall tracking by failure category, regression test suites that ran before every model or prompt change; operated as primary QA layer before anything reached a customer environment

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics 02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led 4 analysts and 3 engineers building Airflow-orchestrated data pipelines on Redshift; architected the "Value Clicks" north star metric correlating content to affiliate conversion, driving **70%+ YoY revenue growth** and **225%+ YoY improvement in revenue per mobile user**
- Built affiliate LTV financial models evaluating revenue-share deals worth \$500K-\$2M/year, presenting directly to CFO with cohort retention, loss rate, and state-level tax modeling

Revenue Analyst, G-Suite Finance 01/2020 – 02/2021

Google | Sunnyvale, CA

- Built P&L reporting suite in GoogleSQL covering **500M+ SaaS users**; improved top-line forecast accuracy by **7%** using Google AI/ML tooling; automated forecast cube generation via Google Apps Script and SAP integration

Manager, Revenue & Forecasting 08/2016 – 12/2019

FanDuel | New York, NY

- Built entire revenue reporting infrastructure on Redshift; built a **Markov Chain Monte Carlo simulation** forecasting season revenue to within **2% error** across 17 user segments; built a Python Slackbot reducing manual reporting by 40%

EDUCATION

B.S. Electrical & Computer Engineering , Bucknell University 08/2012 – 05/2016

AI & Machine Learning Professional Certificate , CalTech / SimpliLearn 10/2022 – 04/2023

INDEPENDENT RESEARCH

MCP-Native Clinical Data Platform 2025 – Present

- Designed an **MCP-native clinical data platform** architected from first principles for a regulated enterprise environment: read path (FHIR R4 and proprietary payer portals as MCP tools), write path (RPA-backed write-through as MCP tools), consent-check middleware with OAuth2 flows, and explicit audit boundaries giving enterprise IT approval chains concrete answers to "what can this agent touch." Six months of architecture documentation, governance framework design, and investor-grade technical memos on enterprise AI governance as an architecture problem before a policy problem.
