

DAN MATHIESON

Notion Builder | Enterprise Solutions Consultant | Technical Consulting Leader

danny.mathieson233@gmail.com | danielmathieson.com | linkedin.com/in/daniel-mathieson | San Francisco, CA

PROFESSIONAL SUMMARY

Solutions consultant who has been building production Notion infrastructure since before it was my job title. At Thoughtful AI I was the workspace admin who built the team's wikis, project tracking, and cross-functional workflows from scratch. At Smarter Technologies I built a 57-script API integration platform on top of Notion: bidirectional Salesforce sync, meeting intelligence pipelines, and a custom deal tracking system managing 61 enterprise accounts. The Notion Meeting Intelligence system I shipped is a live, working demonstration of the kind of GTM workflow automation Notion's enterprise customers want to build, running on real data every day. I have run the full consultative motion, from discovery workshop through implementation sign-off, across \$31.8M in active pipeline with a 96% prospect-to-proposal conversion rate. I know the product from the inside and the sales process from the front.

EXPERIENCE

VP of Solutions

Apr 2026 – Present

AccessHealthcare | San Francisco, CA

Multi-billion dollar healthcare BPO and the largest RCM company in the world. Promoted to VP within the first month after the Smarter Technologies shutdown, retained as the only non-Product/Engineering employee from an 85% company reduction.

- Lead AI adoption strategy across AccessHealthcare's enterprise BPO operation, translating complex agent technology into workflow changes for hundreds of health system and national payer clients
- Serve as primary technical bridge between engineering and C-suite executives at major health systems, communicating AI capability with the depth to build conviction and the clarity to drive sign-off

Director, Sales & Solutions Engineering

2025 – Apr 2026

Smarter Technologies | San Francisco, CA

PE-backed rollup of Thoughtful AI, SmarterDx, and AccessHealthcare. Built the entire SE function and Notion-based GTM infrastructure from scratch while personally managing 62% of total company pipeline.

Notion GTM Infrastructure

- Built the company's **Notion Meeting Intelligence system**: a multi-agent pipeline that ingested every sales call recording, extracted deal intelligence across five categories (requirements, objections, competitive signals, pricing context, ICP fit), and wrote structured records directly into Notion deal workspaces via the API
- Designed and maintained the **full deal tracking workspace** in Notion: linked databases for accounts, contacts, pipeline stages, product coverage, and meeting history, with bidirectional sync to Salesforce via 57 Python integration scripts
- Built **76 prospect workspaces** using Git worktrees as isolated deal environments with automated sync across Notion, Google Drive, Fireflies, and GitHub Actions; shipped **943 commits and 451 PRs** while managing live pipeline
- Packaged **22 AI skills via Claude's co-work platform** so non-technical team members could invoke agentic workflows directly from Notion pages without writing prompts from scratch

Enterprise Pre-Sales

- Managed **61 simultaneous enterprise healthcare deals** across hospital systems, behavioral health, oncology, home health, and dental, achieving a **96% prospect-to-proposal conversion rate** within 30 days of first meeting
- Anchored a **\$30-40M health system design partnership** (65,000-employee system): led 2-day on-site discovery sessions covering Epic integration depth, enterprise data architecture, cost-takeout framework, and multi-year roadmap
- Closed two enterprise deals: a **\$1.9M TPA administrator win** and a **\$1M/yr EHR vendor strategic partnership** covering 80+ enterprise customers

NOTION DEPTH

57

Production Python scripts integrating Notion API

76

Deal workspaces built with automated sync

Admin

Workspace admin at Thoughtful AI: wikis, tracking, workflows

SE RESULTS

\$31.8M

Active pipeline managed (61 enterprise deals)

96%

Prospect-to-proposal conversion rate, 30 days

TECHNICAL SKILLS

Notion Platform

Notion API, Linked Databases, Rollups, Filtered Views, Permission Hierarchies, Notion AI, Workspace Admin, Templates, Formula Fields

GTM and Integrations

Salesforce (bidirectional sync), Google Drive/Sheets API, Fireflies GraphQL, GitHub Actions, Make/Integromat, Webhooks

Agentic AI

Claude Agent SDK, Multi-Agent Pipelines, RAG, pgvector, MCP, Prompt Engineering

Languages and Data

Python, TypeScript, JavaScript, SQL (Redshift, PostgreSQL), pandas, Jupyter

Frontend and Infrastructure

Next.js, React, AWS, Docker, Git, GitHub Actions

EXPERIENCE (CONTINUED)

Solutions Architect / Customer Engineer / Lead Technical Product Manager

2023 – 2025

Thoughtful AI (acq. by New Mountain Capital; merged into Smarter Technologies, Sep 2025) | San Francisco, CA

Series A healthcare AI startup building revenue cycle automation agents. Progressed through 3 roles in 2 years. Served as Notion workspace admin: built and maintained the team's wikis, project tracking databases, cross-functional workflows, and linked views for engineering, sales, and customer success.

- Built Thoughtful's **Notion workspace from scratch** as admin: structured databases for customer accounts, automation plans, implementation timelines, and project status, with linked databases, rollup formulas, filtered views, and permission hierarchies across all functions
- Delivered **63% of company net new ARR** during a year when Thoughtful grew 3x year-over-year: owned the full pre-sales cycle from scoping through production sign-off, achieving a 96% funnel pass-through rate as the primary technical advisor
- Ran **on-site discovery workshops at two large health systems**: a 65,000-employee integrated health system and a major regional health system in the Southwest, producing scoped automation specs with customer-signed definition of done before any code was written
- Built Thoughtful's **first production GenAI system**: a hybrid-RAG eligibility verification solution achieving over **95% accuracy within two days**, presented to the board and replicated across 3 automations within a month
- Developed a **PRD delivery methodology**: 8-20 hour SOP capture sessions with customers, pseudo-code decision-tree specs engineers built from directly, and a personal test plan execution before every production sign-off
- Built the company's **first customer-facing analytics product** on AWS QuickSight: custom PostgreSQL queries parsing nested agent execution logs into executive dashboards used in QBRs

EARLIER EXPERIENCE

Senior Director, Data Science & Analytics

02/2021 – 10/2022

Action Network (acq. Better Collective) | Remote

- Led a team of 4 analysts and 3 engineers building **Airflow-orchestrated data pipelines** on Redshift, scraping 80+ partner dashboards and reducing reporting cycles from weeks to hours
- Architected a post-acquisition pivot from audience to revenue metrics: built the **"Value Clicks" model** driving **70%+ YoY revenue growth** and a **225%+ improvement in revenue per mobile user**

Revenue Analyst, G-Suite Finance

01/2020 – 02/2021

Google | Sunnyvale, CA

- Built revenue dashboards and P&L statements covering **500M+ SaaS users**; improved top-line forecast accuracy by **7%** using Google AI/ML tooling

Manager, Revenue & Forecasting

08/2016 – 12/2019

FanDuel | New York, NY

- Built the entire revenue reporting infrastructure on Redshift SQL: daily retention analysis, LTV segmentation, and bonus targeting across C-suite Chartio dashboards
- Built a **Markov Chain Monte Carlo simulation** forecasting season revenue to within **2% error**

EDUCATION

B.S. Electrical & Computer Engineering, Bucknell University

08/2012 – 05/2016

AI & Machine Learning Professional Certificate, CalTech / SimpliLearn

10/2022 – 04/2023
